WE ARE THE FLAT ROOFING EXPERTS

Polyroof was established in 1984 as a family run business. We continue to focus on the same core values that have seen us become renowned for delivering quality products and services. As of today, we remain the only independent UK manufacturer of cold-applied liquid roofing systems.

With the versatility and superior performance of our liquid systems, we are confident that there is no alternative that can protect a roof better.

We've been working within the education sector for over 30 years, where our deep understanding of stakeholder requirements is highly valued.

For academy clients, we offer a genuinely unique package without the involvement of costly third party consultants or surveyors. Rather, we have partnered with an experienced Academy Business Manager with a **100% CIF / funding success rate** to deliver a service that is unrivalled in its value.

FLAME-FREE ROOFING SOLUTIONS FOR ACADEMIES

No matter whether the roof is a new build or refurbishment, large or small, complex or simple; Polyroof's liquid systems will form a seamless waterproof membrane across the entire area. The finished surface is tough, flexible and impervious to water. With proven lifespans in excess of 25 years, Polyroof systems are the number one choice for all flat roof and balcony applications.

What's more, all Polyroof systems are fully cold-applied with no naked flames or hot works, eliminating the risk of fire and making them a responsible choice for your roofing works.

KEY FEATURES:

- The new waterproofing is applied direct to insulation boards or existing coverings
- *Rapidcure* technology for fast, disruption-free installations - even during term time
- Cold applied with no flames, no hot works, no fire risk - the responsible and dutiful choice
- No joints, no seams, no welds, no weak points
- Tough, impact resistant finish that is vandal proof and easily accommodates foot traffic
- Key accreditations including BBA, FM and ETA
- Academy installations carry Polyroof's trusted 25 Year Guarantee with independent insurance

**EVERY KEY
ACCREDITATION**

"The level of service we received from Polyroof went above and beyond the expected. We've received expert support at every step, from preparing the application package through to contract monitoring during the roofing works. A key benefit for our Academy was the cold-applied installation process, which removed any concerns around the risk of fire and the issuing and monitoring hot work permits. This process, along with the fact the old roofs were retained without the need for stripping, meant that the works were carried out during term time with minimum disruption to our Academy. We couldn't be happier with the finished result; last year alone, we saved over £50,000 on fuel bills."

SARAH DAVIES, BUSINESS MANAGER AT LAKELANDS ACADEMY

CONSULTATION

An initial meeting with our Academy Team to determine your requirements and to assess the viability of the proposed application.

SURVEY REPORT

Polyroof Technical Services perform a full detailed assessment of the roof areas including a Conditional Survey Report with budget prices.

FUNDING SUPPORT

Polyroof's academy business manager partner prepares the submission and offers full assistance with the completion of the online application forms.

ROOF UPGRADE

The application is successful, funds are released and your academy receives Polyroof's fully guaranteed, cold-applied and long-lasting warm roof system.

THE POLYROOF ACADEMY SERVICE

We don't use any third party consultants or surveyors. We have instead partnered with an experienced and respected academy business manager with a 100% CIF / funding success rate.

We don't just provide information to help you with your funding application. We will prepare the application for you in a tried-and-tested format and even provide assistance with the online submissions.

This is how we are able to save our Academy clients significant costs whilst delivering an all-encompassing flat roof upgrade service.

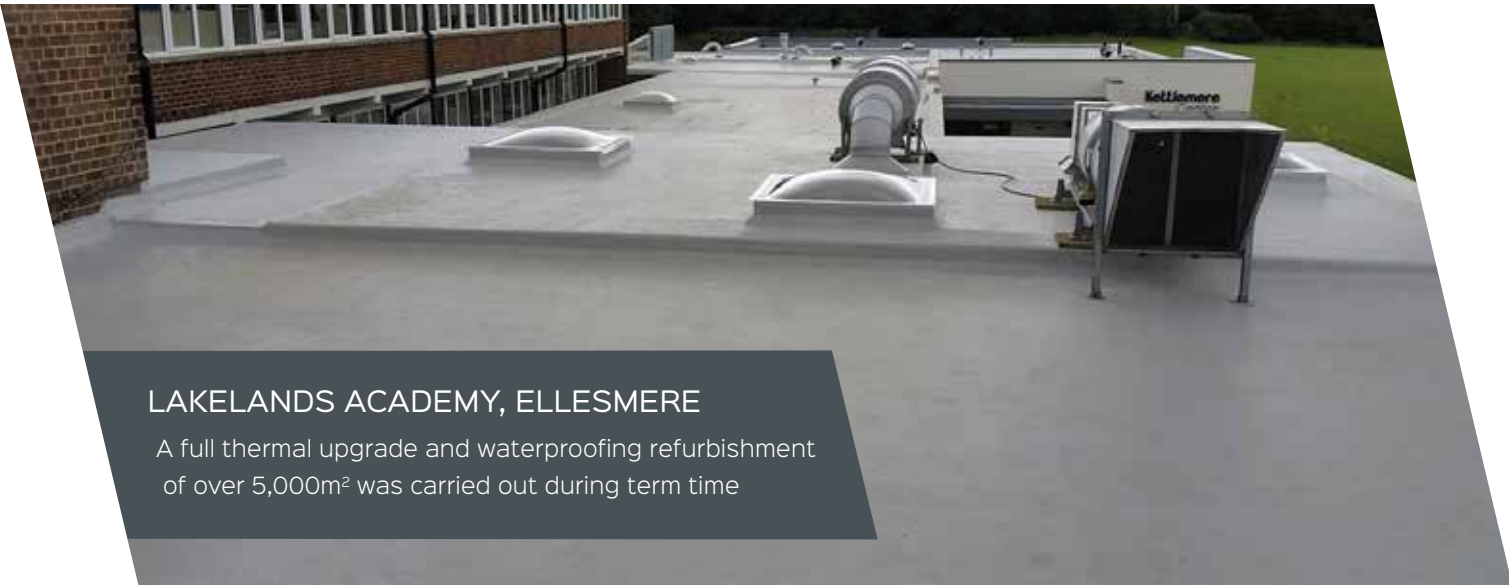

From the very start, the process is entirely open and transparent and without any commitments or obligations.

Between the roofing expertise of Polyroof Technical Services and our partner's proven ability to secure funding, we offer a Total Roof Upgrade Package for Academies that delivers genuinely superior value.

"We are delighted with the versatility and performance of Polyroof systems. We are never limited in our designing - no matter how complex the roof, Polyroof are able to provide a waterproofing solution."

SENIOR SURVEYOR AT DUMFRIES & GALLOWAY COUNCIL

LAKELANDS ACADEMY, ELLESMERE

A full thermal upgrade and waterproofing refurbishment of over 5,000m² was carried out during term time

KIRKCUDBRIGHT ACADEMY, DUMFRIES

Various aged and leaking roof areas were refurbished without disruption to this academy

BARTON ACADEMY, TORQUAY

This Academy conversion project used Polyroof's systems across a variety of waterproofing applications, including these colourful reading pods

DISCOVER WHAT WE CAN DO FOR YOUR ACADEMY

Polyroof's Total Roof Upgrade Package is open to all Academies with flat roofs in need of attention, whether it's remedying leaks or improving thermal performance. Our systems are also ideally suited to new build projects, where we offer a comprehensive technical support service to ensure optimum roof design.

To discuss the requirements for your Academy contact Polyroof's Technical Services department on:

- Telephone: 0800 801 890
- Email: academies@polyroof.co.uk
- Online: www.polyroof.co.uk/academies

Please note that our Academy business partner has other areas of professional responsibilities and, as such, the Total Roof Upgrade Package is a strictly limited offer. For each funding period we are required to operate on a first come, first served basis.

In the event that we are fully booked for the current financial year, it is still possible to reserve a spot for the following year. We therefore encourage Academy clients to get in touch as early as possible for the highest likelihood of receiving this offer.

JOSEPH SWANN ACADEMY, GATESHEAD

Over 6,000m² of single-ply was directly coated with Polyroof's Protec System

PENWORTHAM ACADEMY, PRESTON

Nearly 2,000m² of flat roof areas were upgraded with the Protec Warm Roof System
