

1. 185 System
2. 18mm Polyroof Approved Plywood / OSB3 (TG4)
3. Suitable PIR Insulation
4. Vapour Control Layer
5. Polyroof GRP Fillet Trim
6. Lead or GRP Flashing

NOTES

As per standard building practice, care must be taken positioning the flashing with regard to any cavity tray.

On balconies the fillet trim may be substituted with a right angle trim (refer to FIG207).

A temporary or secondary seal may be achieved by applying a bead of silicon sealant to the back of the fillet trim.

It should be noted that flashing details are not covered by the Polyroof guarantee.

For further guidance please contact Polyroof Technical Services.

Title: Wall Abutment

System: 185

Ref: 2.08

Scale: NTS
(Do Not Scale From Drawing)
